Paramathi Velur, Tamil Nadu, India

PROFESSIONAL SUMMARY

Results-driven Aspiring Data Analyst with Basic Knowledge in Power BI, Tableau, SQL, and Python. Delivered 4 end-to-end business intelligence dashboards spanning aviation analytics, financial performance, and sales intelligence — translating complex multi-source datasets into actionable visual narratives. Combines a strong foundation in Artificial Intelligence and Data Science with practical experience in voice automation and AI powered web development. Certified across multiple analytics platforms and committed to delivering measurable business impact.

INTERNSHIP EXPERIENCE

Intern Data Pattern	Present
Data Science Intern SkillCraft Technology	July 2025 – August 2025

EDUCATION

B.Tech — Artificial Intelligence & Data Science	2023 – 2027
Rrase College of Engineering, Padappai CGPA: 8.56	
HSC — Bio-Maths	2022 – 2023
Government Higher Secondary School, Jedarpalayam 80%	

TECHNICAL SKILLS

Data Visualization: Power BI, Tableau, Microsoft Excel
Programming: Python (Basics), SQL(Basics)
Analytics: Data Cleaning, Data Wrangling, Trend Analysis
AI& Web Dev: AI-Powered Web Development

PROJECTS

- Flight Delay & Cancellation Analytics Dashboard** | Power BI
- Built a multi-page interactive dashboard analyzing 500K+ flight records to surface delay patterns, on-time performance, and route-level cancellation trends across 10+ airlines — reducing manual reporting time by 60%.
- Financial Analysis Dashboard** | Power BI
- Developed a financial intelligence dashboard tracking revenue, expenditure, and profit margins with automated year-over-year growth calculations and budget variance analysis for enterprise-scale reporting.
- Sales Performance Analysis Dashboard** | Power BI
- Engineered a dynamic sales dashboard monitoring revenue trends, regional performance, top products, and customer segmentation — eliminating manual data consolidation and automating monthly reporting.
- Titanic Survival Pattern Analysis** | Power BI
- Designed an analytical dashboard revealing survival correlations across passenger class, gender, and age demographics using advanced data transformation for accurate, high-performance reporting.
- Blood Donor Management System** | Python
- Developed a Python-based system with modules for registering donors, filtering by blood group, and matching patient requirements against available donors with relevant contact information.

Jarvis AI — Voice Assistant | Python

► Built a Python voice assistant that responds to spoken commands to open Google, YouTube, and websites via browser, search and retrieve information online, play songs or videos, display live global time, and narrate jokes — delivering a hands-free interactive experience through speech recognition.

AI-Powered Dessert Ordering Platform | AI | Web Development

► Developed a full-stack AI web application with intelligent personalization logic — improving user engagement and streamlining the end-to-end customer ordering journey.

CERTIFICATIONS & TRAINING

- Oracle SQL Workshop — Codetalon Technologies (2026)
- Python Workshop — CADDAM Technologies (2025)
- Internship Common Aptitude Test — iStudio Technologies (2025)
- Power BI for Business Analytics Workshop — NextGen Technologies (2024)
- Power BI Advanced Training — NextGen Technologies (2024)
- Data Analytics Fundamentals — NoviTech R&D Private Limited (2024)
